Organisation

Per Esempio Onlus is a non profit association, founded in 2011 and based in Palermo, Italy, in the neighborhood of Albergheria/Ballarò.

We focus our action on the human being and its cultural, social and economic development.

Our activities are inspired by values of solidarity, participation and intercultural dialogue and aim to foster local development processes.

Mission

Through our actions we aim to empower individuals and communities; we do this by enhancing social inclusion of the people at risk of marginalization, whilst remaining focused on the respect of rights and diversities.

Specifically, our activities are focused on children, youngsters and adults education, gender empowerment, job orientation paths, neighborhood events and public spaces regeneration.

What we do

Education

We fight to prevent children and youngsters educational deprivation and to promote non formal education paths and learning activities - such as labs and events - in disadvantages areas of Palermo;

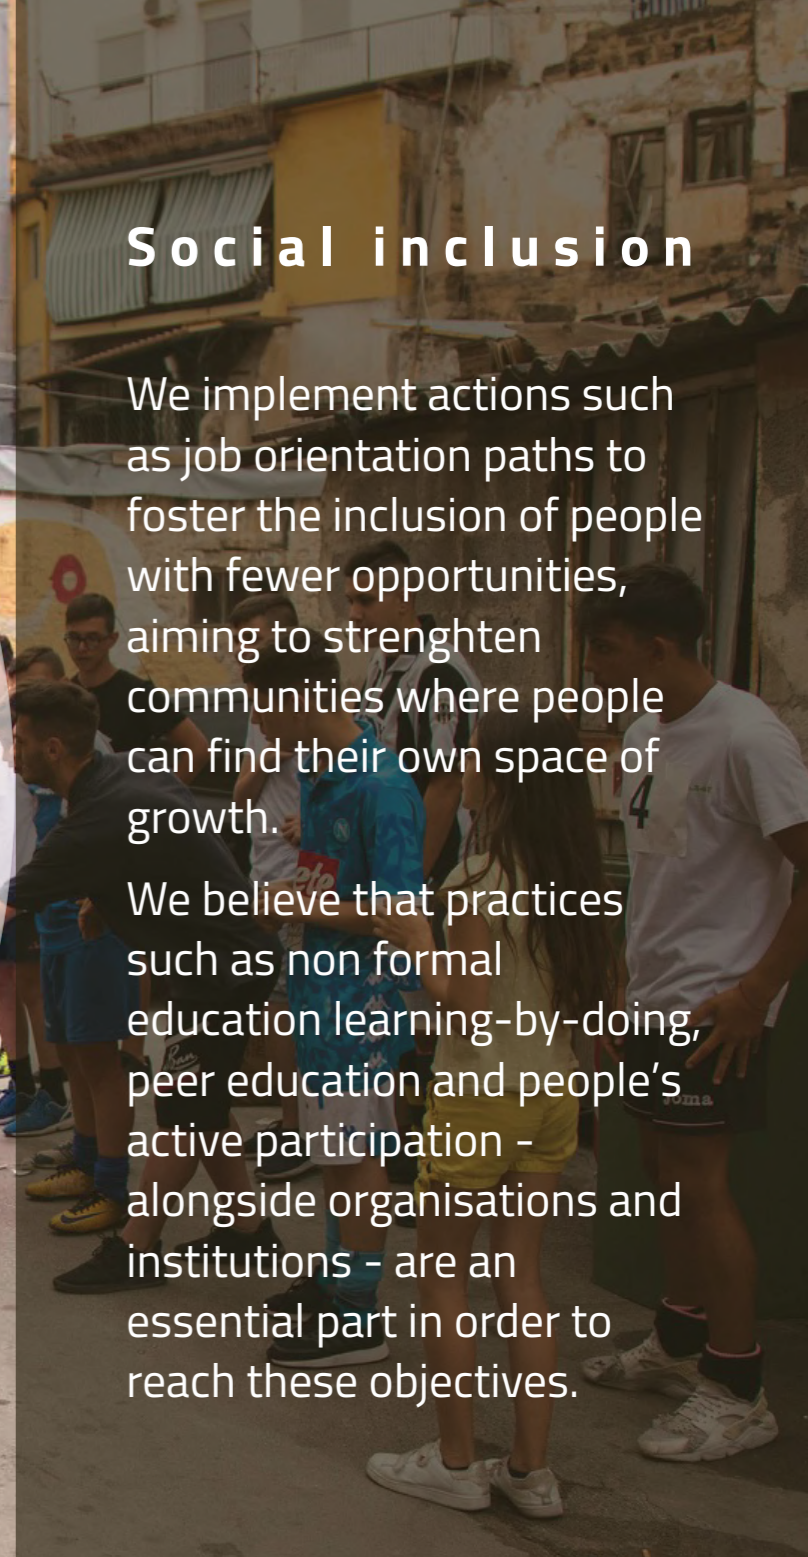

We also implement learning and orientation actions targeting adults, notably migrants; focusing our strategy on an empowerment approach, we support their learning paths through online and face-to-face activities.

Social inclusion

We implement actions such as job orientation paths to foster the inclusion of people with fewer opportunities, aiming to strengthen communities where people can find their own space of growth.

We believe that practices such as non formal education learning-by-doing, peer education and people's active participation - alongside organisations and institutions - are an essential part in order to reach these objectives.

Gender empowerment

We provide support to women with social and economical problems to discover and follow their own potential and to escape from violent contexts.

In order to increase their self-consciousness, we run awareness raising activities on topics such as health, education and autonomy.

We also give assistance to women-mothers in need through activities of job and service guidance.

Youth mobility

Fostering participation and youth mobility is among our priorities: we run international exchanges, trainings and volunteering projects, aiming to allow the acquisition of new skills, the interaction among different cultures and the creation of awareness about human rights issues.

In order to allow the achievement of soft skills on the ground, we host volunteers in our offices or in partner organisations working locally with children, women and migrants.

Space Regeneration

Through our projects, over the years, we have redeveloped and returned to the community several spaces within the neighborhood in which we operate, and beyond.

Some of the interventions we have carried out concern the recovery of public squares, creation of public gardens and sports grounds, restoration of school gyms, redevelopment of urban spaces through graffiti and street arts.

Events

Our project activities are often accompanied by collateral events such as theatrical and art performances and film shoots, in which the beneficiaries of the projects are directly involved as an active part.

We also promote social-themed editorial presentations, and support neighborhood social events such as the *Ballarò Buskers*, *Mediterraneo Antirazzista*, *Carnevale Sociale* and *Arte Migrante*.

Projects

Local level

We have carried out more than 60 projects at the local and national level. Most of the projects have been financed by entities such as Con i Bambini, Fondazione con il Sud, Otto per Mille Valdese, INDIRE, ANG and Comune di Palermo.

Throughout the years we built a network of more than 50 local partners. We have also started a partnership with AltroVerso social laundry, with whom we share project experiences aimed primarily at employment inclusion.

International level

At the international level most of our projects - as of today more than 40 - are financed by the European Commission - Erasmus+ Programme.

Since 2011 we have been developing projects in cooperation with many organizations from all over the world with which we collaborate primarily in projects involving adults, young migrants and youthworkers, about topics such as learning paths, gender empowerment and hate speech.

Projects at local level

NAME	F.A.R.O. – Favorire l'autodeterminazione, le relazioni e l'orientamento ai servizi

Objectives

Promoting inclusive and “circular” societies through art, creativity and visual education in youth work.

Status

Ongoing

Staff

Project area

One of the strengths of the project area is the heterogeneity of the studies the project managers come from: pedagogy, psychology of work, sociology, anthropology, diplomatic sciences, philosophy.

The various training experiences represent indeed an additional resource for addressing the project experience in its specific needs on different levels and from multiple points of view.

Administration / Communication

In support of the activity of the project managers and the association there are two administration managers and the creatives of the communication area: a content creator/social media manager, a videomaker/photographer and a graphic designer.

We strongly believe in teamwork and we all work together for the effectiveness and quality of our action.
